OPERATING SAFETY CIRCULAR No.05/25

Sub: Working of Station staff during adverse weather conditions and asset failure situations -reg.

During last few weeks there are some cases of disruption to traffic on account of adverse weather conditions causing physical obstruction on track or OHE or S&T failures.

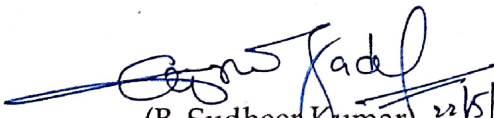

In such situations the main focus should be on coordinating with concerned departments for early restoration.

In this regard it is reiterated that staff should strictly follow the prescribed rules and safety protocols and should not follow any short cut methods for train operations to minimize the detention during failures.

Whenever any failure occurred at Stations for minimizing detention of trains OFF duty staff (TI/SM, Points man, TMR) to be called immediately for attending and manning the Station.

Hence it is instructed that all Section TIs, SMRs to sensitize the staff under your jurisdiction to follow the rules and procedures prescribed in the rule books for working of trains under such situations and information should be conveyed immediately by station staff to the Control office and Divisional officers concerned without any delay.

Any deviation in this regard is not permitted and will be viewed seriously.
